Save Time and Costs

How Would Using Procurement as-a-Service save me money?

- The “as-a-Service” model fully supports your low risk and low-value procurements under \$1,000,000. Driven by the GovP2P workflows with experienced staff guiding every step of the process.
- Using both the “as-a-Service” and a part-time resource enables stakeholder engagement and offers greater support to internal business processes. Often this is used for larger project procurements that involve detailed guidance and engagement with internal staff. Our “as-a-Service” procurement staff continue support each procurement activity.
- Of course, for the heavy lifting or large tendering processes, we offer dedicated staff that generally operate from our client’s premises. While this is seen as more like the traditional style of delivery, the GovP2P model has a bonus: you get the dedicated staff member, but they are backed by a team of experienced staff with a broad spectrum of experience in supply chain and procurement.

Key benefits for using "Procurement as a Service" in Government

- **Access to a wider range of skills and expert knowledge.**
 - Using the as-a-Service model gives access to SME’s across many categories.
 - SME’s with experience in federal, state and local governments.
- **Not paying for a Full-Time equivalent contractor/a long term.**
 - You’re not committing budgets to long term contracting.
 - The procurement activities are done by multiple levels of staff.
- **Vary your workloads to suit your business needs without the worry of procurement staffing capacity.**
 - GovP2P takes the worry out of scaling resources to meet your business needs.
 - The forward planning process aligns priorities and capacity to provide a seamless scaling of resources.
